EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Janet Hood on July 16, 2009.

The application has been amended as follows:

9. (currently amended) A diagnostic system for a check valve of a positive displacement pump having a solid-borne sound sensor, comprising:

a calculating device configured to calculate a first operative sound level of a first value of a first operative sound signal recorded in a first state of the valve induced during operation of the pump and to determine a second operative sound level of a second value of a second operative sound signal recorded in a second state of the valve induced during operation of the pump, wherein the first sound value is determined based on a current sound signal recorded in the first state of the valve and the second sound value is determined based on a last sound signal recorded in the second state of the valve, the last sound signal being a half period delayed and stored;

a determining device configured to determine ~~the~~ a relevant state of the valve via an auto correlation; and

a signal output that displays a fault if a deviation between the first sound level determined for the first state of the valve and the second sound level determined for the second state of the valve exceeds a pre-determinable threshold value,

wherein the sensor measures solid borne sound and records the sound signals.

12. (currently amended) The diagnostic system in accordance with claim 11, wherein the ~~evaluation~~ determining device determines the valve state based on an auto correlation of the first sound signal recorded and/or an auto correlation of the second sound signal recorded.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nashmiya S. Fayyaz whose telephone number is 571-272-2192. The examiner can normally be reached on Tuesdays and Thursdays.
